RE: Notification Compliance Achieved

Dear Mr. Katz:

I appreciated your cooperation during my visit to your facility.

As you know, Governor Christine Gregoire has made the cleanup of Puget Sound a priority for Ecology. The Urban Waters Initiative strengthens efforts to identify sources of pollution in and around Puget Sound by working with businesses to address those sources.

Based on the material you forwarded me, it appears your facility is in compliance with the corrective measures I identified.

Thank you for your continuing efforts. Together we can improve the condition of Puget Sound waters. If you have any questions or concerns, please contact me at (425) 649-7055 or email me at dogr461@ecy.wa.gov.

Sincerely,

Donovan Gray, Urban Waters Inspector
